SUMMARY

Motivated Full-Stack Developer. I am an ambitious, responsible, and goal-oriented individual who values continuous learning and seeks new experiences. I possess flexible analytical thinking that allows me to navigate situations efficiently and make independent decisions. Proficient in interacting with people, I excel in negotiation and maintain a customer-oriented approach. Leveraging emotional intelligence, I tackle complex problems with ease. Additionally, creativity is a key asset that enhances my problem-solving capabilities.

PROJECT EXPERIENCE

[WebStudio](#), [GitHub-repository](#) (HTML5, CSS3, SASS, BEM).

Responsive design, transform effects, modal windows. With the help of CSS, SASS mixins and placeholders, created gallery templates with various options for placing images, which can then be reused. Used the BEM methodology. By typing something into the feedback form, the text will move as you type. Everything was implemented using CSS. JS was not used.

Role: Developer

Pet Project

[IceCream](#), [GitHub-repository](#) (HTML, SASS, Parcel).

Adaptive design, animations, modal windows, and burger menu for ordering.

I've crafted the Hero section. With the sole use of CSS and a pseudo-element, I've adopted an innovative technique for showcasing a pop-up window in this area.

Role: Developer

Team Project

[ImageFinder](#), [GitHub-repository](#) (HTML, SASS, JS, Parcel, REST API).

A website with a responsive layout. Image search service utilizing functional JavaScript for seamless functionality and user experience.

Role: Developer
